

Salaried General Practitioner

A forward-thinking dispensing practice in the Boroughbridge area seeks to hire a new salaried GP, preferably with an interest in women's and reproductive medicine, although this is not absolutely essential. There is a real sense of a team within the practice, and this supportive and friendly working environment has resulted in a settled and happy workforce with a high rate of staff retention. The opportunity to join the team comes with it a real chance to help shape the future of the practice.

We are both a training practice and accommodate students from HYMS, and were nominated as one of the top GP practices for our work with this last year. We consistently score in the highest ratings of patient satisfaction, and we aim to continue this whilst maintaining a good-work life balance for all staff. There is a daily mid-morning coffee meeting and we foster a working environment which allows informal clinical discussion.

We are well supported by our pharmacy team, a social prescriber, paramedic and wellbeing advisor, alongside three first contact physiotherapists.

Location:

Boroughbridge, North Yorkshire. Located close to the A1M.
